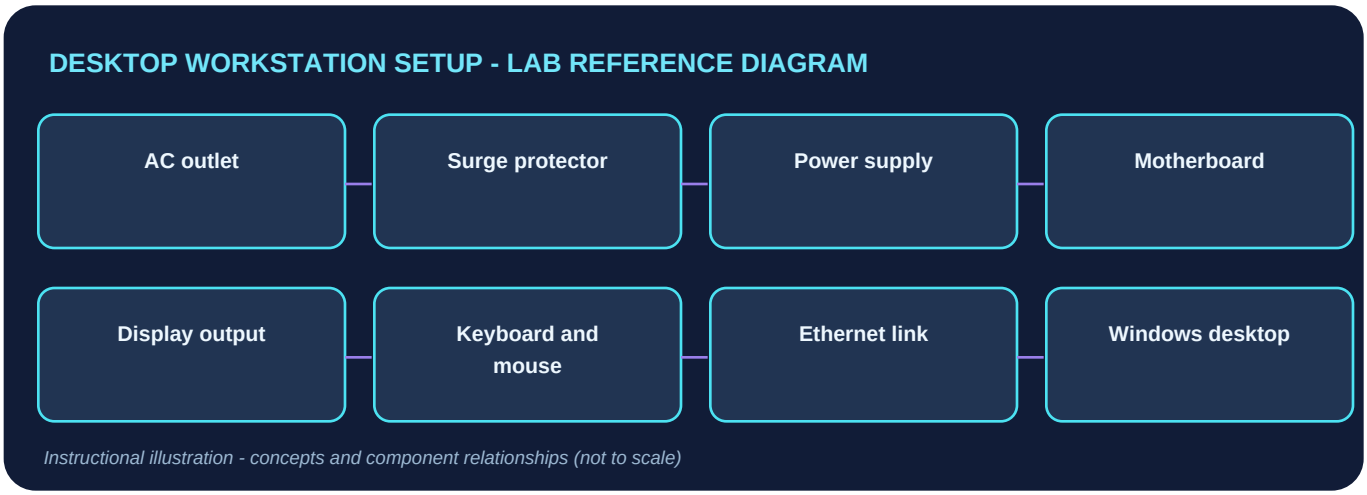
2.1.16 Set Up a Desktop Computer

STUDENT STUDY GUIDE + VOCABULARY + VISUAL REFERENCE

Learning goal

Build and connect a functional desktop workstation.

Reference image



Use the labeled illustration to identify the key components, commands, or checkpoints you will encounter in this lab.

Prepare for the simulation

1. Connect power with the PC turned off.
2. Attach the display to the correct graphics output.
3. Connect USB input devices and the Ethernet cable.
4. Power on, verify POST and confirm Windows recognizes devices.

Troubleshooting and safe practice

• No picture: confirm monitor input, power and GPU video connector.

• No network: check link LEDs and ipconfig /all.

2.1.16 | VOCABULARY & REVIEW

Essential vocabulary

Term	Meaning / recognition cue
AC outlet	A key term in desktop workstation setup; identify its purpose, where it is used, and how to verify it.
Surge protector	A key term in desktop workstation setup; identify its purpose, where it is used, and how to verify it.
Power supply	Electrical power characteristic or component; assess safely with rated tools and correct connectors.
Motherboard	A key term in desktop workstation setup; identify its purpose, where it is used, and how to verify it.
Display output	Signal connection or output; verify the correct interface, source and operational status.
Keyboard and mouse	A key term in desktop workstation setup; identify its purpose, where it is used, and how to verify it.
Ethernet link	A key term in desktop workstation setup; identify its purpose, where it is used, and how to verify it.
Windows desktop	A key term in desktop workstation setup; identify its purpose, where it is used, and how to verify it.

Knowledge check - answer in your own words

1. Identify two components or commands in the reference diagram and explain what each does.

2. What should you verify before changing or installing hardware, settings, or files in this lab?

3. Choose one listed failure symptom. What is your first safe diagnostic step?

4. How will you prove the task is complete, rather than merely assuming success?

Lab readiness checklist

[ ] I can identify the labeled reference items. [ ] I understand the safety precautions.

[ ] I can explain the vocabulary. [ ] I can verify and document successful results.
