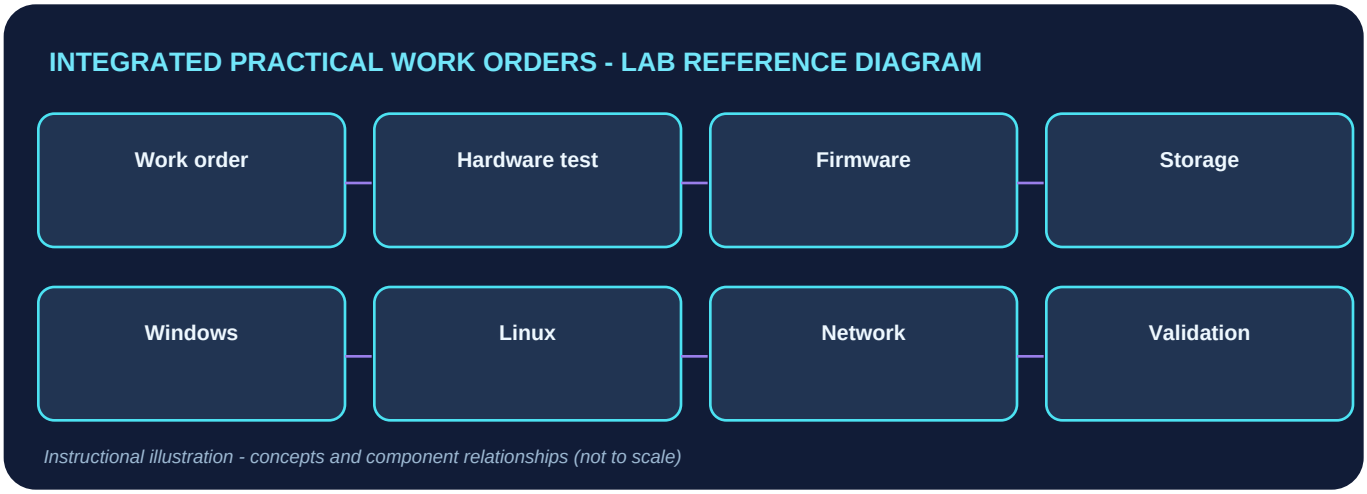
# FINAL Virtual IT Support Practical Exam

STUDENT STUDY GUIDE + VOCABULARY + VISUAL REFERENCE

## Learning goal

Twelve-work-order comprehensive troubleshooting capstone.

## Reference image



Use the labeled illustration to identify the key components, commands, or checkpoints you will encounter in this lab.

## Prepare for the simulation

1. Read and prioritize each simulated work order.
2. Record observed symptoms before taking action.
3. Complete and verify all required practical missions.
4. Answer knowledge questions and print a final report.

## Troubleshooting and safe practice

• Incomplete objectives reduce score; inspect each verification step.

• Save the completed PDF assessment for Canvas submission.

# FINAL | VOCABULARY & REVIEW

## Essential vocabulary

| Term | Meaning / recognition cue |
|---|---|
| Work order | A key term in integrated practical work orders; identify its purpose, where it is used, and how to verify it. |
| Hardware test | Observation or tool used to identify faults and confirm the repair. |
| Firmware | A key term in integrated practical work orders; identify its purpose, where it is used, and how to verify it. |
| Storage | Storage device or management concept; confirm detection and preserve existing data. |
| Windows | A key term in integrated practical work orders; identify its purpose, where it is used, and how to verify it. |
| Linux | A key term in integrated practical work orders; identify its purpose, where it is used, and how to verify it. |
| Network | Networking value or component used to establish and troubleshoot connectivity. |
| Validation | A key term in integrated practical work orders; identify its purpose, where it is used, and how to verify it. |

## Knowledge check - answer in your own words

1. Identify two components or commands in the reference diagram and explain what each does.

2. What should you verify before changing or installing hardware, settings, or files in this lab?

3. Choose one listed failure symptom. What is your first safe diagnostic step?

4. How will you prove the task is complete, rather than merely assuming success?

## Lab readiness checklist

[ ] I can identify the labeled reference items. [ ] I understand the safety precautions.

[ ] I can explain the vocabulary. [ ] I can verify and document successful results.
