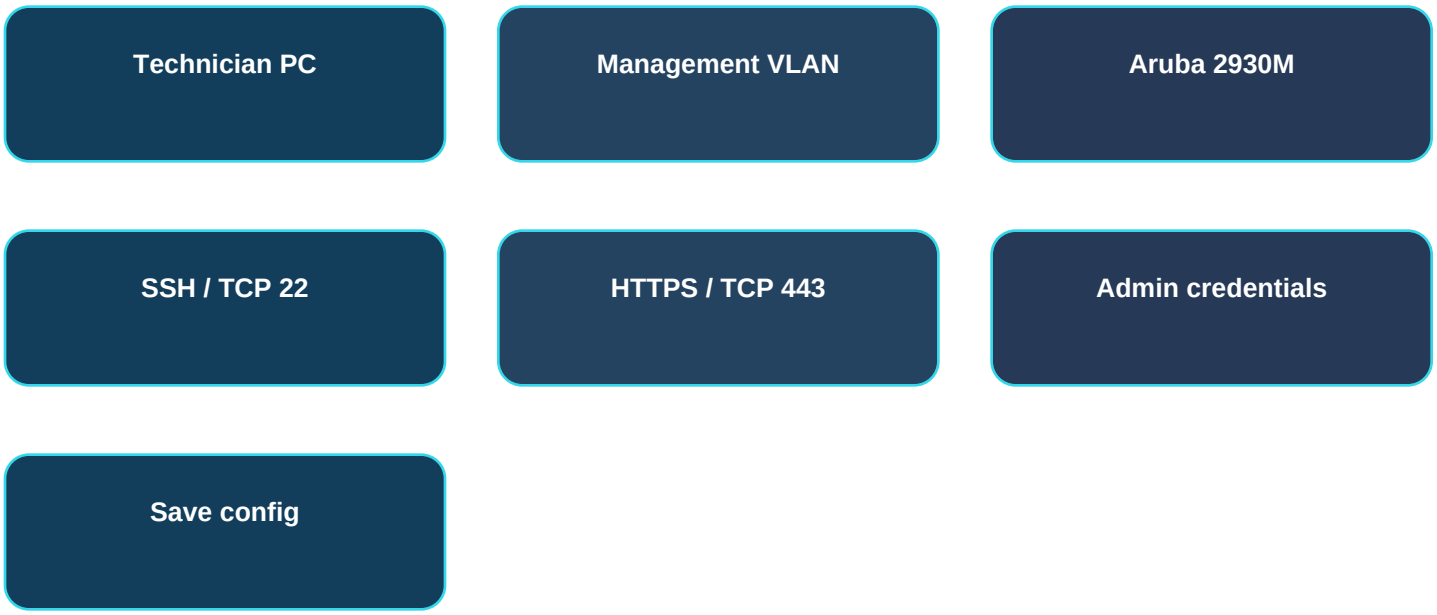
Aruba 2930M SSH and HTTPS Security

NET-ARUBA | Study Guide & Vocabulary | Created by Mr. Beaird

Visual Reference - System Components / Workflow



Preparation Checklist

- Confirm the switch management IP address and reachability.
- Use authorized local credentials; enable secure management protocols.
- Verify certificate identity or trust for HTTPS and host fingerprint for SSH.
- Restrict remote management and save tested configuration.

Training reference diagram; not a vendor-specific photograph or configuration screenshot.

Aruba 2930M SSH and HTTPS Security

NET-ARUBA | Study Guide & Vocabulary | Created by Mr. Beaird

Vocabulary and Technical Reference

SSH
Encrypted command-line remote management.

HTTPS
TLS-protected web administration.

Management VLAN
Separates administrative switch traffic from users.

Default gateway
Route used to reach remote management clients.

Local account
User permitted to authenticate to the device.

Access control
Restricts which hosts can reach management services.

Configuration save
Persists intended configuration after reboot.

Review and Troubleshooting

[ ] What observable evidence confirms the objective was completed?

[ ] What two common configuration or hardware errors could cause failure?

[ ] Which tool, indicator, or command would you check first?
