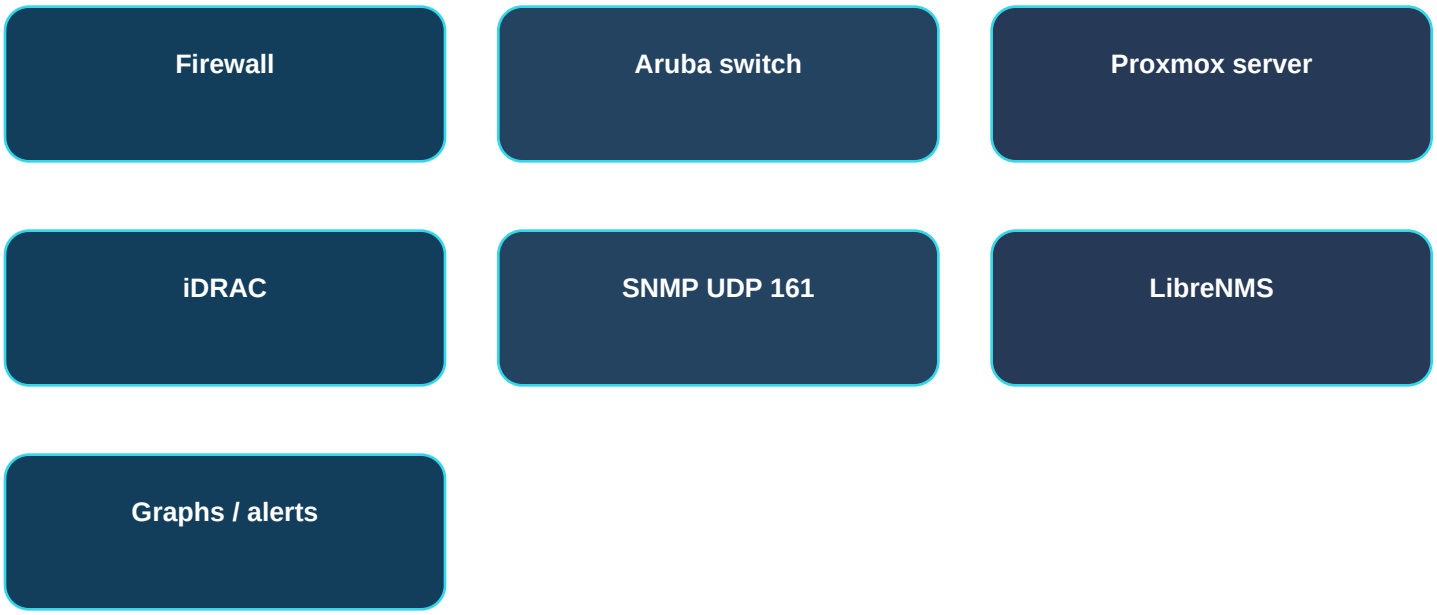
LibreNMS SNMP Discovery Lab

MON-LIBRE | Study Guide & Vocabulary | Created by Mr. Beaird

Visual Reference - System Components / Workflow



Preparation Checklist

- Verify DNS, firewall and routing between monitor and each managed device.
- Configure an authorized SNMP agent; prefer SNMPv3 where possible.
- Test connectivity and read-only SNMP response before discovery.
- Add devices, run discovery/polling, and inspect interface/sensor graphs.

Training reference diagram; not a vendor-specific photograph or configuration screenshot.

LibreNMS SNMP Discovery Lab

MON-LIBRE | Study Guide & Vocabulary | Created by Mr. Beaird

Vocabulary and Technical Reference

SNMP agent
Service exposing device management information.

SNMP manager
Monitoring application that queries the agent.

OID
Object identifier for a specific management value.

MIB
Definitions giving meaning to OIDs.

Polling
Periodic collection of current device state.

Discovery
Identifying devices, ports, sensors and identity.

SNMPv3
Authenticated and optionally encrypted SNMP version.

ICMP
Used for network reachability checks.

Review and Troubleshooting

[ ] What observable evidence confirms the objective was completed?

[ ] What two common configuration or hardware errors could cause failure?

[ ] Which tool, indicator, or command would you check first?
