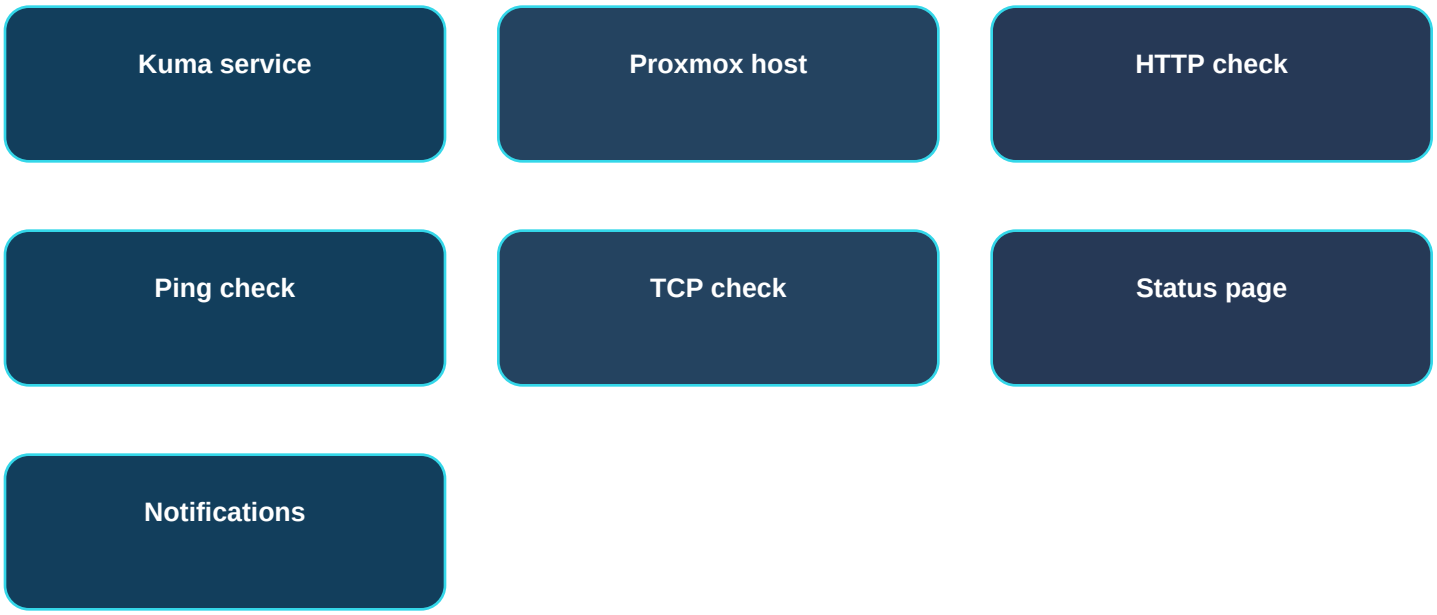
# Uptime Kuma Monitoring Lab

MON-KUMA | Study Guide & Vocabulary | Created by Mr. Beaird

## Visual Reference - System Components / Workflow



## Preparation Checklist

- Install or access a maintained Uptime Kuma instance.
- Create an HTTP/HTTPS monitor for one web interface.
- Create ping or TCP checks for infrastructure services.
- Verify the recorded status and understand SSL trust/error behavior.

Training reference diagram; not a vendor-specific photograph or configuration screenshot.

# Uptime Kuma Monitoring Lab

MON-KUMA | Study Guide & Vocabulary | Created by Mr. Beaird

## Vocabulary and Technical Reference

### Monitor
Saved test for an endpoint or service.

### HTTP check
Requests a web URL and evaluates its response.

### Ping check
ICMP probe for host reachability.

### TCP port check
Tests whether a remote port accepts a connection.

### Response time
Time observed for a check to complete.

### Interval
How often the monitoring check runs.

### Status page
Summary of service condition for viewers.

### Alert
Notification when a monitor changes state.

## Review and Troubleshooting

[ ] What observable evidence confirms the objective was completed?

[ ] What two common configuration or hardware errors could cause failure?

[ ] Which tool, indicator, or command would you check first?
